Course Summary

Course Description	<p>This course offers an introduction to the development of and current issues in South Korean society. South Korea has undergone incredible social change over the past 150 years. Primarily an agrarian and feudal society ruled by a monarch in the late nineteenth century, Korea rapidly transformed into a technologically and economically advanced democracy which has recently received attention as a cultural powerhouse. This course begins with the Joseon Dynasty period, and works its way through the Japanese colonial era, the emergence of the two Koreas, and then focuses on the transformation of South Korea from one of the poorest countries in the world to one of the most advanced. Although political and economic developments are noted, the focus will primarily be on how Korean society and culture have developed from its traditional roots throughout the twentieth century. Moreover, this class will challenge students to question how current social issues in Korea are the result of the rapid changes of the past century and to think of solutions for those issues.</p>
